Description

Zonel Software is a software company established in 1992. Our solutions are used by over 1500 customers of various profile - trade, services, manufacturing, accounting, hospitality, marketing, state institutions, banks and other financial institutions. Our specialty are programs for accounting, material and commercial operations with ample of managerial oriented reports for sale. Our software solutions are not restricted to a particular field and are therefore applicable to any type of company or industry.

Our solutions include: Financial operations - everything related to accounting; payroll calculation; automatic posting of input, output, wages, treasury operations; basic resources, interest; automatic compiling annual accounts, gross balance, concluding sheets, VAT advance payment tax..

Material operations- a full record of inventory, sales and operations, import and export of goods, warehouses, shops. All the necessary reports for management.

Programme for cash registers - working in the shop / restaurant, entry and exit of goods, analysis of operations; It can work alone or with automatic connection to the material operations and financial performance. For restaurant - working with tables, deleverage by normatives

AMBION - system for accurate and timely measurement of temperature measuring more points, with great opportunities for setup according to your needs.

Restaurant operation with Android Tablet devices - We created two applications: Guest - guests themselves through the device make orders that are printed on the tag printers in the kitchen / bar, thus avoiding waiting waiter to order. Waiters - waiters going from table to table with the device and place orders directly on the device. The order is printed in marker printers in kitchen / bar.The waiter through the device have insight which tables are open and what is requested.

HELIX Mobile / PDA devices - HELIX Mobile - itinerant sales and field collection - for any kind of wholesale and distribution to customer, acceptance and sales in warehouse, inventory, restaurant operation. Automatic monitoring of the performance of each distributor central monitoring location, ongoing insight into all invoices made, visited customers and committed charges. ZONEL GPS System - on-line connectivity to mobile devices, review the current location or past movements
