Bilateral Meetings

- (11a.m. - 1p.m.)
- (1.30p.m. - 3.30p.m.)

Description

E-seniors is a French organisation with several years experience in the field of e-Inclusion, ICT training courses and active aging. E-seniors activities are divided in two categories: ICT courses for seniors and disabled people and european projects. These two aspects are complementary since our courses permit us to be on the field and close to seniors' every day life.

Offer

Pilot tests to validate new technologies for active and healthy ageing

□ Since 7 years E-Seniors supports and runs pilot testing in real environment with end-users to validate new technologies for active and healthy ageing.

During the validation phase, E-Seniors leads or is actively involved in the following tasks:

- Setting up user groups: interview/filtering
- Carrying out tests
- Validating pilot application and prototype interfaces and issuing recommendations with regards to specific approaches more adapted to a senior public
- Gathering conclusions from users' feedback in order to make recommendations improving the design of the product

Expected Input for Potential partner: We are looking for coordinators, industrial and technical and academic partners. We are gladly be a part of the consortium as an end-user representative.
