- (1.30p.m. 3.30p.m.)

Description

We are a technology startup company Asymbo from Czech Republic. Since 2014 we have been developing m-shop. **Online stores receive their own native mobile application for iOS and Android.** Our added value is mainly fast application launch (2-4 weeks), affordable price based on monthly or annual licenses (SaaS), advanced functionality and original graphic design. We are the first and only ones who develops mobile applications just for e-commerce in Czech Republic. Since official entry into the Czech market in July 2015, we acquired 70+ B2B clients of all sizes and specializations. There are just few developers like us in global market.
