Description

ABOUT US

GORD Systems is independent software development and IT Outsourcing vendor. Established in 1989, the company is a leading SW solution provider in the country with many years of international projects experience. GORD Systems Services was established in 2006 as a daughter company with focus on IT Outsourcing services for international clients.

The team of experts consists of experienced IT specialists and consultants with deep understanding of the business processes in several industry sectors.

Our software solutions and services aim to help the organizations to improve and automate key business processes, giving them freedom to implement full control over their businesses and focus themselves rather on business development.

GORD Systems Services provides IT Outsourcing services to clients in EU and North America.
